

PART I: AS
STONEWALL
DISCRIMINATES,
WE CAN TOO

'FULL INCLUSION':
WHAT WE ARE UP AGAINST

FULL INCLUSION CLAIMS: FALSE AND HYPOCRITICAL.

- Such claims by Stonewall etc shame and shut down nasty haters like us who allegedly do not accept everyone.
- However, they do not include 'all' either, but get away with it.
- So push back: 'Well, how are *you* helping the still-closeted minorities?' (see below).
- It works! Peter Tatchell was shut down in live debate on this point.
- NB: everyone counts, but sexualities vary. Some are good, others not.

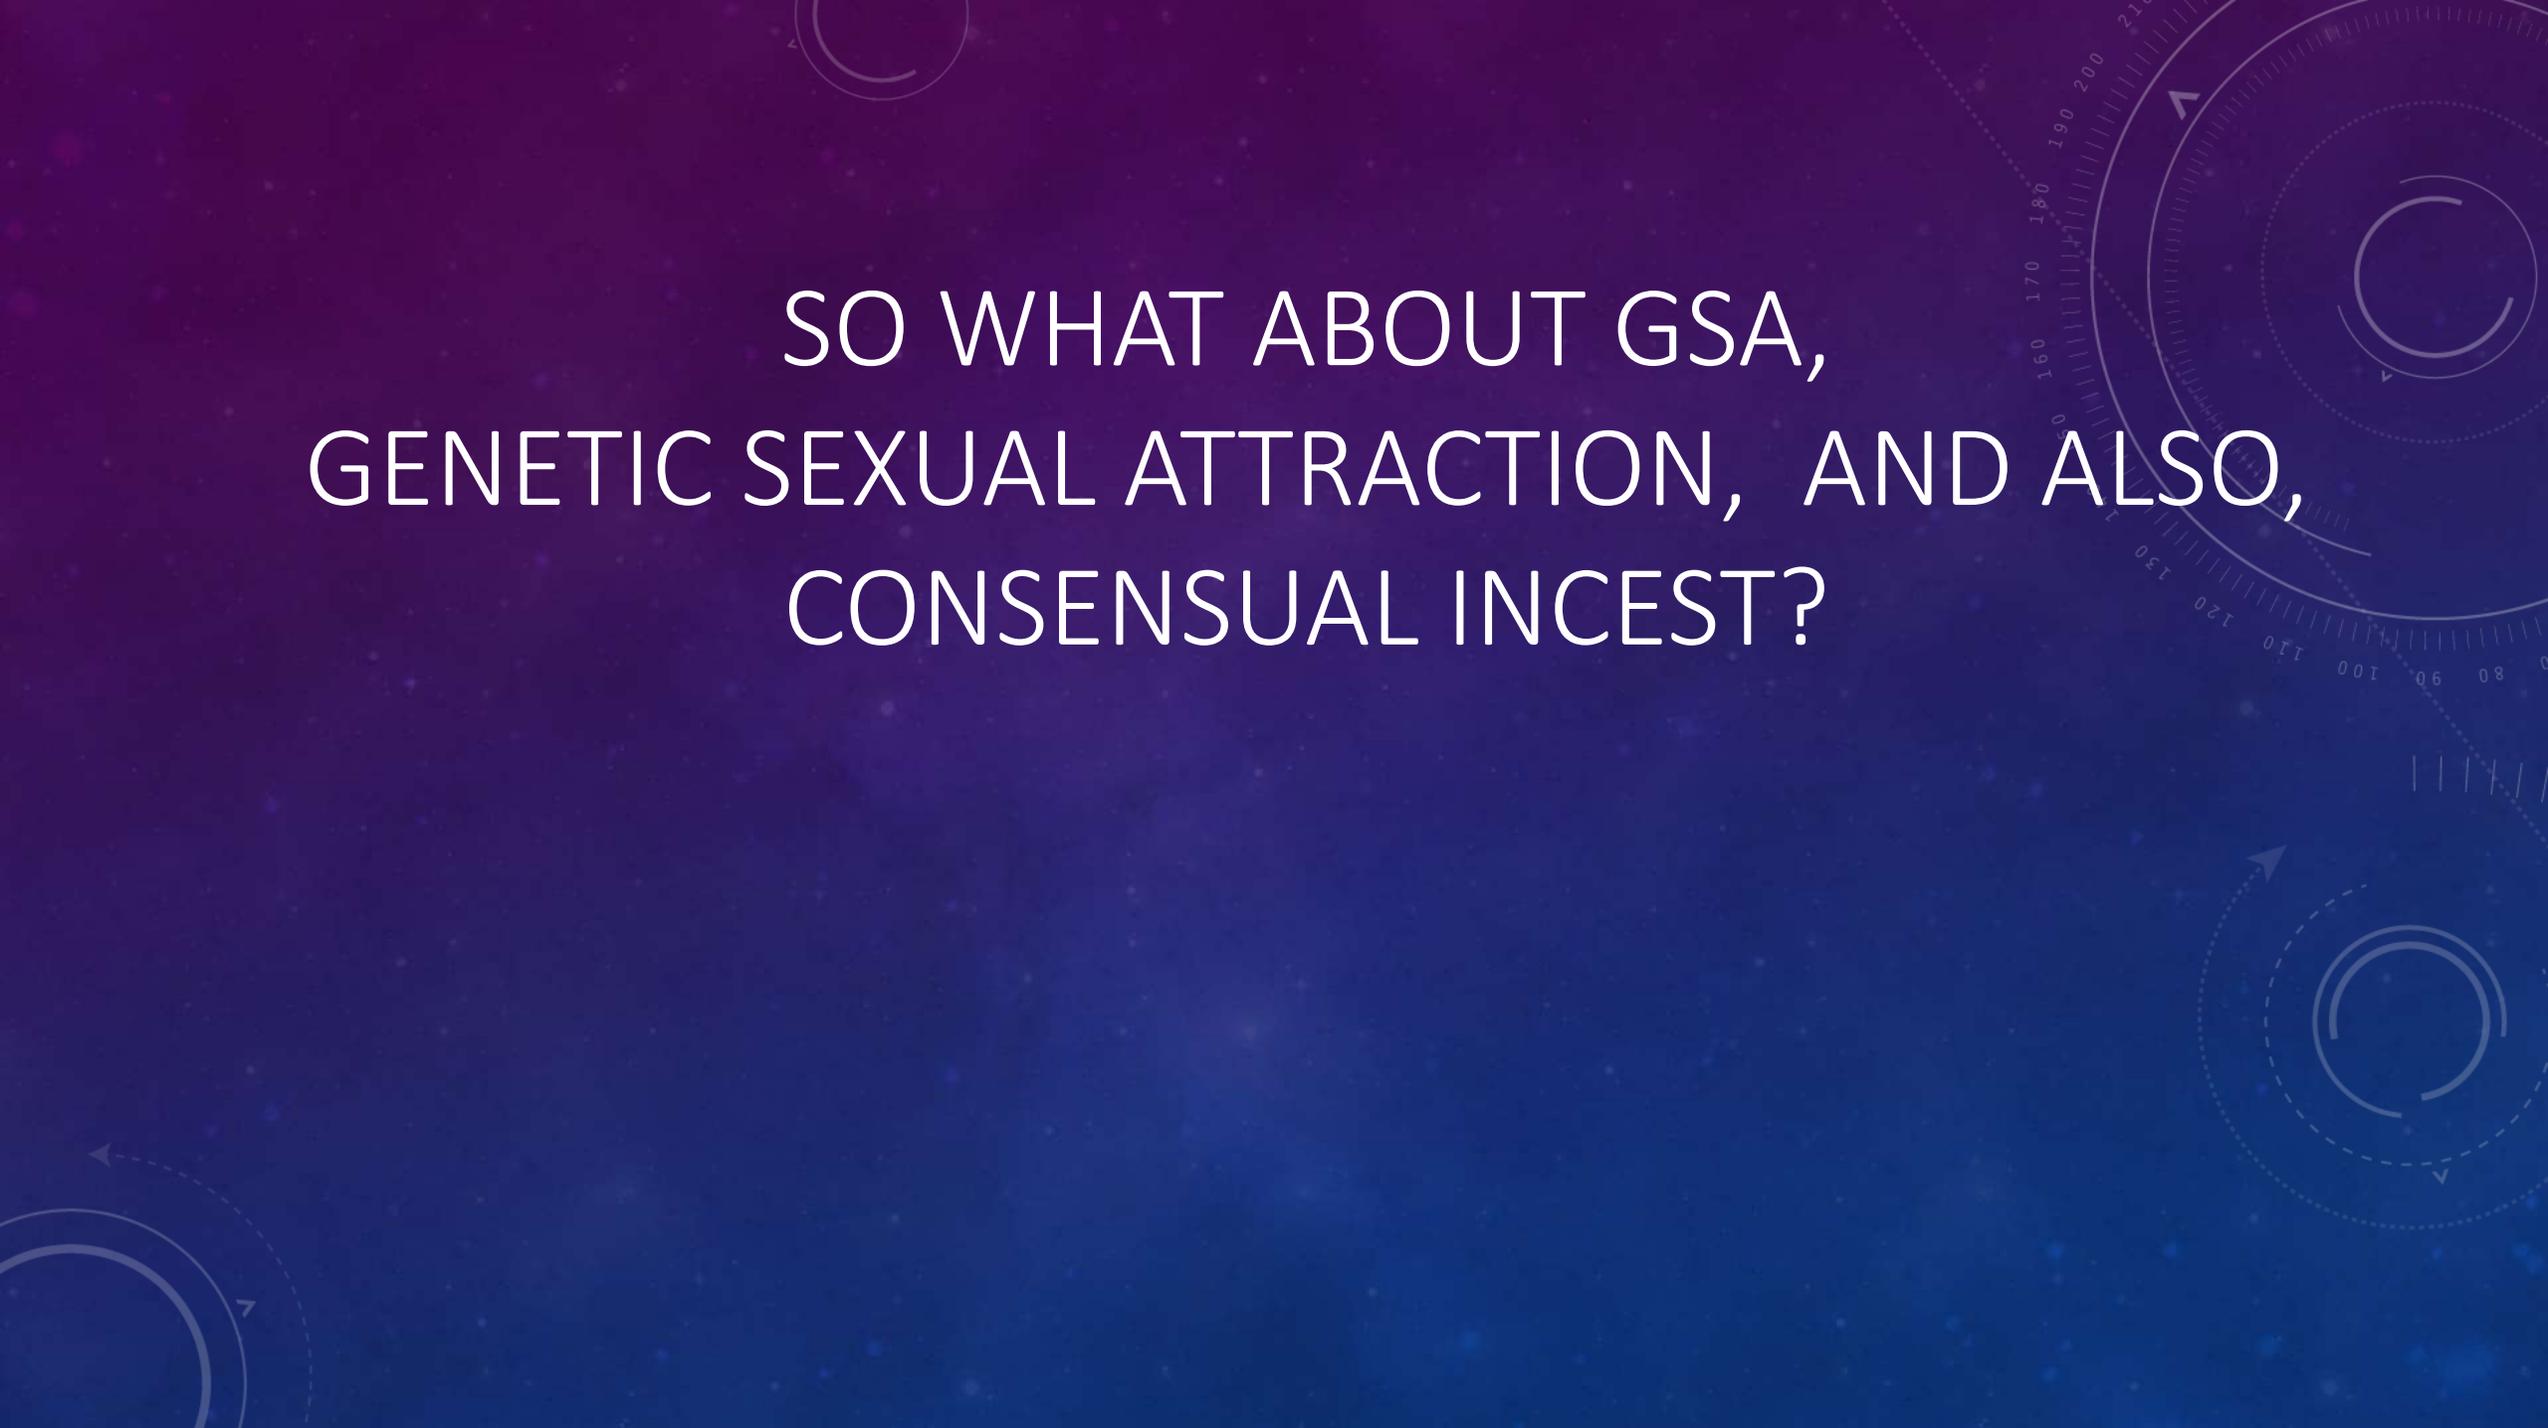

BRISTOL CHURCHES, SUMMER 2022

CHRISTIANS AT PRIDE, LONDON, JULY 2022

- We believe God's inclusive love is for **all**, and that our sexualities and gender identities reflect the beauty of who God is.

The background is a dark blue gradient with a subtle pattern of white stars and faint technical diagrams. On the right side, there are several circular diagrams resembling gauges or dials with numerical scales (0, 80, 100, 110, 120, 130, 140, 150, 160, 170, 180, 190, 200, 210) and arrows. There are also some dashed lines and other geometric shapes scattered across the background.

SO WHAT ABOUT GSA,
GENETIC SEXUAL ATTRACTION, AND ALSO,
CONSENSUAL INCEST?

THE NEW DAY,

UNDERSTANDING NECROPHILIA

A GLOBAL MULTIDISCIPLINARY APPROACH

Edited by Lee Mellor, Anil Aggrawal, and Eric Hickey

PART II. WHY
ARE YOU
TEACHING MY
CHILD
EXTREME,
UNHEALTHY
SEXUAL
PRACTICES?

'THE WAR ON CHILDREN'. HOW TOXIC RSE DAMAGES THEM: GENERAL

- Sexualizes children
- Threatens their health
- Promotes a dangerous gender ideology
- Undermines the parent-child relationship
- <https://www.comprehensive sexuality education.org/film/>

WHY ARE YOU TEACHING MY CHILD EXTREME, UNHEALTHY SEX PRACTICES?

- 1. Developmentally, children are not teens, and neither children nor teens are adults. Much RSE ignores this.
- 2. Given time limitations, I will speak briefly on teen a/ vulnerabilities and b/ hazardous sex. We finish with the 'advice' from the hugely popular (100K viewers/month) <https://www.bishuk.com/>, and in particular, its rough sex and kink 'guides'.

TEENS AND SEX: TOXIC COMBINATION 1

- Their **limbic system** (the brain's reward/pleasure centre) appears to be fully developed but not their **PFC, prefrontal cortex**: the centre of reasoning, judgment, goal-setting, impulse control, delayed gratification. In key ways they are not mature, yet believe they are!
- Surging **hormones** seem to alter levels of dopamine, contributing to risk-taking, thrill-and-novelty seeking.
- Girls have one-layer thick **cervixes**, which help explain their high rates of STIs.
- **Chemicals** released in the brain during sex can become addictive and bond partners together whether or not they realise it. Grossman; McIlhane and Bush.

TEENS AND SEX: TOXIC COMBINATION 2

15-24 YO males are **3 times**, and 15-24 YO females **6 times** more likely to be diagnosed with an STI than their adult counterparts. (PHE 2020)

Negative outcomes for sexually-active youngsters also include:

Association with increased risk-taking, drugs, crime, likelihood of dating violence, rape; poorer emotional health, lower-self esteem, depression. See me for citation.

Even worse, youngsters are unaware of these vulnerabilities.

TEENS AND SEX: TOXIC COMBINATION 3

- Teens engage in anal sex---the popular RSE Bishuk gives tips---which prevent pregnancy. However, do kids know about ...?
- 1. The gossamer thin, easily torn rectal lining; 2. faeces full of hazardous pathogens; 3. the lining's close proximity to the blood stream; 4. the action of the M [Microfold] cell, which transports foreign bodies (like HIV) **to** the body's lymph system etc. Miriam Grossman MD has more.

TEENS AND SEX: TOXIC COMBINATION 4

- Sobering statistics from MSM (Men who have Sex with Men): higher rates of STIs (see below); diseases like cancers and hepatitis A, B, also C; and damage (e.g. anal incontinence). <https://www.lgbthero.org.uk/Pages/Category/stis> also <https://www.sandyford.scot/media/2567/msm-ceg-july-2015.pdf>
- Even when MSMs use condoms, the *BMJ* (8 Aug 2015, p 26) claimed HIV transmission was reduced by 64%, and other STIs by 42%.
- Huge overrepresentations of MSMs: **2.9%** (ONS 2019) of the pop., **41%** of new HIV (Terrence Higgins 2019); **67%** increasingly-hard-to-treat new Gonorrhoea and **83%** new Syphilis cases (PHE 2020).

BISH'S TACIT PROMOTION OF ROUGH SEX/KINK: NB PORN PLAYS A HUGE ROLE HERE TOO.

- Rough sex: slapping; choking/strangling; biting. Kink: restraint; pain; marked / mark; discipline. Bish links to Love Uncommon for full-on kink: oral/anal (rimming), fisting (up the vagina/anus), double penetration, whipping, nipple 'torture'.
- As noted, teens are disadvantaged, so breezily foregrounding these extreme, high risk activities is abuse. In the name of 'doing it safely' Bish normalizes and tacitly encourages it. Note: teens are told 'smoking kills' , not 'how to smoke safely'.
- Moreover, masochist Alfred Kinsey, Father of the Sexual Revolution, sounded the alarm on diminishing returns. More is needed to obtain less. Kinsey graduated from inserting straws to pipe cleaners to toothbrushes, bristle end, up his urethra while masturbating, to achieve climax. He ended semi-impotent.

MORE ON THE LAW OF DIMINISHING RETURNS & DAMAGE

- Re rough sex: *After the Ball* gay authors too sound the alarm: ‘Although pain and hate have nothing to do with love, they have plenty to do with lust; the brain centres of sexual arousal and aggression are rather closely connected... Repeatedly exercising this connection strengthens it and leads ... to an inability to experience arousal without aggression’. p 305.
- Re kink: When asked about inserting (sterilized) needles into the clitoris while masturbating, gay ‘sex guru’ Dan Savage replied: ‘Short-term stimulation and excitement ... has the potential to cause permanent damage, chronic discomfort, and numbing of these areas. Permanent scarring and deformation can also occur. This is something that may not be correctable—even with surgery’.

<https://www.straight.com/life/348296/my-needle-fetish-causing-permanent-damage>

A close-up photograph of a woman with dark, curly hair, looking slightly to the right with a concerned or questioning expression. Her mouth is slightly open, and her eyebrows are furrowed. The background is a soft, out-of-focus light blue.
