ONE. Capturing kids.

Deceptive propaganda: 'Be who you are. Love who you want'. True in a certain respect, but the bigger agenda is toxic.

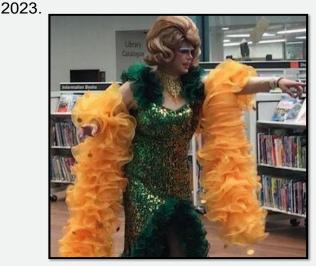

Dissemination: Comprehensive Sexuality Education [CSE], which normalises such phenomenon as this 'chest feeding "dad" (left: *Time*, 2016), a classic example of 'the new normal'. We are most concerned by activists, LGBT and straight!

Capturing kids: Drag Queen Story Time/CSE.

'You think that we'll corrupt your kids if our agenda goes unchecked. Funny, just this once, you're correct.

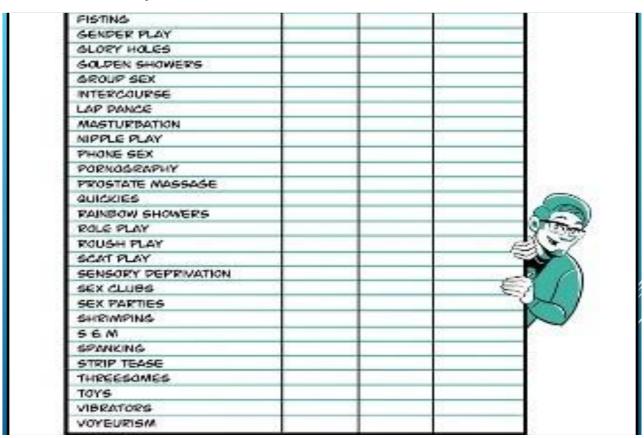

We'll convert your children, happens bit by bit, quietly and subtlety and you will barely notice it'.

NB: Many LGBT abhor and denounce such activism: it is important to differentiate!

a. Recommended by Sexwise

Example (above) from a link in the body of the UK CSE programme: Sexwise. Teresa May's 'Conservative' Government promoted (2018) this sexual 'health' resource for schools (!) https://vfjuk.org.uk/wp-content/uploads/2020/10/FINAL-1-Can-lists-make-your-sex-life-better-complete.pdf

Youngsters are encouraged to 'explore' their sexuality via the deliberate violation of taboos (sex 'play' with faeces, urine, vomit; voyeurism); multiple simultaneous partners; high risk activities like fisting, which involves inserting a hand up the vagina/anus; and pain---lots of it!

b. Bishuk.com

Similar kinds of appalling CSE examples are found on the hugely popular (2023) UK teen sexual 'health' site: bishuk.com, for kids 'over 14' but we know teachers direct younger children to it.

In the UK, the AOC (age of consent) is still legally, technically, 16, but in reality, increasingly 14 or even younger, as long as there is no significant age difference between the partners.

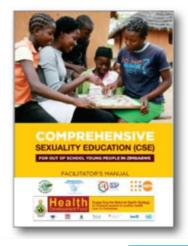

Also see Laurence Fox' powerful 'Groomed: How [UK] Schools Sexualise Your Children'. Fox is a well-known but cancelled actor and leader of the more conservative social and political Reclaim Party): https://www.youtube.com/watch?v=XA07ta2tJpQ

c. Zimbabwe's UNFPA CSE

See below for even worse CSE in Zimbabwe, funded by the United Nations Population Fund, the UNFPA, p 66. Sadly, respectable evangelical Christian organisations have signed on, and to be fair, it is not all bad. However, it is diabolical in this respect and others.

The many downsides of sexual activity for youngsters are suppressed; important biological and physiological facts about sex and the vulnerabilities of young bodies are ignored and inaccurate claims of condom effectiveness given.

This CSE programme claims to create awareness which does not encourage experimentation. [LSN: this is nonsense! But more later] 10yos are taught about:

- · Bestiality: sexual pleasure from animals.
- · Necrophilia: " " corpses.
- · Pederasty: " " young boys.
- · Urophilia: " " urine.
- · Coprophilia: " " faeces.

Our kids are being taught they can safely play with fire, while the offices of doctors and therapists are filled with those who have been burned, inside and out. Miriam Grossman MD, adapted.

TWO. Why CSE is bad sex ed!

CSE sexualises children. Damages their health. Teaches a dangerous gender ideology. Undermines the parent-child relationship (among other things).

THREE. Pushback

As well as promoting and normalizing extreme, bizarre, high risks behaviours, CSE minimizes or ignores politically incorrect but accurate truths about sex, bodies, especially young bodies, condom effectiveness, diseases and consequences.

It ignores basic child and adolescent development principles and treats children as if they were adolescents, and both as if they were adults. They are not!

The result: flawed sexual 'health' which is neither comprehensive or accurate.

Smart kids now know not to smoke. Why? Because of the vulnerability of their lungs. Smoking now is far worse than smoking as an adult. However, one cigarette doesn't alter their future. One sex act gone wrong can be a game-changer.

Finally, the most important advice is not given: 'Press pause, wait till you grow up, and then marry someone who too has waited. After that, be exclusive: no other sex partners. Fabulous, disease-free sex is yours for life!'

Smart sex messages all youngsters need to know

Sex is big.

Whether you realize or want it to be or not. Your body remembers every sex act.

Sex is glue.

Chemicals produced in sex glue partners, whether they realize or want it to or not.

Sex is fab.

Christians believe God thought it up and said it is very good. He created orgasms!

Sex is fire.

One sex act gone wrong can change, even damage, you for life. Be smart!

Sex is for later.

Marriage can give best sex. Press pause, grow up and then circle back.

Sex has a greater impact on your teen than on your adult body.

Public health statistics support this. Girls in particular are at risk.

Sex is often addictive.

Teens are more susceptible than adults because of immature pre-frontal cortex brains (impulse control and delayed gratification) but developed pleasure centres; and surging hormone levels.

Females and males experience sex differently.

Why? because of inherent biological differences.

Not all sex acts carry the same risks.

Some are far more hazardous than others. Receptive anal intercourse is high risk!

There is always forgiveness and a fresh start.

It is called 'secondary virginity'.

Use your mistakes to help others and become a better stronger person.

God never wastes anything if we give Him the pieces.

We don't break the Commandments: we break ourselves on them.
